

Choose the right grade water for your application needs.

Reagent water is an essential material for any laboratory. Based on your application, Boston BioProducts (BBP) has the right water for your intended experiment. Applications supported include molecular biology, PCR/sequencing, cell culture, bioprocessing, protein research and immunology, and cell biology.

BBP reagent water comes in standard bottle sizes and can also be ordered in custom aliquots and bulk quantities starting from 1 ml up to 300 Liters.

**Reverse Osmosis
Deionized (RODI) Water**

**Molecular Biology
Grade Water**

**Nuclease Free Water
(Non-DEPC Treated)**

**Nuclease Free Water
(DEPC Treated)**

Distilled Water

Cell Culture Water
